INSTRUCTIONS FOR USE AND PRECAUTIONS:

A harness is an individual protection equipment, it must be assigned to a single user (it can only be used by one person at a time). A harness must be previously adjusted to the size of the operator. The ropes should be adjusted, once and for all, so that the rope that goes under the buttocks is in place and the dorsal plate is properly located between the shoulder blades. A harness should be held as close as possible to the body, without excess, in order to free the user's movements. Respect the following stages:
